Shock Absorption

Absorbs impacts from jumps and protects the joints and muscles involved, making exercise a more comfortable and enjoyable experience.

Vertical Deformation

Excellent power return enables athletes to increase their on-court performance. Superior vertical stability eliminates "area" indentation.

Superior Ball Bounce

A good sports floor has identical ball bounce in all areas and all across the floor.

Sliding Properties

Optimal slip coefficient offers natural grip avoiding falls and accidents, provides a safe playing surface.

1. Easy Maintenance

UV coating provides excellent resistance to dirt build-up while providing a durable surface that's easy to maintain.

2. 100% Vinyl Wearlayer

Superior durability and the sports floor life expectancy is 15 years above.

3. Reinforced Woven Fiberglass Inner Layer

This provides even greater indentation resistance and shock absorption while increasing the overall durability of the surface complex.

4. Closed Cell Foam Backing

Excellent shock resistance.

Superior stability, no shifting underfoot.

Good energy return for extended activities.
